

COURSE RECORDING

A recording of this program will be available for three days from either the end of the program (or three days from the date of purchase, if you purchase the recording after the session ends). It is presented in four-hour sessions and can be watched an unlimited number of times for three days (for the registrant). There is no additional cost beyond the registration fee.

WESTERN BULK POWER SYSTEM: *Changing Resource Mix, Market Developments & Emerging Solutions*

September 28-29, 2020
Online | Central Time

"EUCI consistently has subject matter experts who speak at their conferences. Everything is highly organized and it's always a pleasure to attend."

Director of Business Development,
Ascend Analytics

FOLLOW US @EUCIEvents

The Western electric grid is experiencing significant changes in its bulk power system through an evolving resource mix, paradigm shift in generation sources and expanding regional electricity markets. Contributing to these fundamental shifts in the grid is the continued penetration of demand-side and energy storage solutions, in tandem with a transition from baseload fossil-fuel generation fleet to a more diversified (and distributed) clean energy generation resource mix.

This course provides a comprehensive picture of the Western Interconnect's underlying physical and policy infrastructure, as well as the most current grid and market issues and initiatives – their practical impacts on the operations and strategies – affecting power organizations active in the region.

EUCI is authorized by IACET to offer 1.4 CEUs for the course. Participants must log on each day and be in attendance for the entirety of the course to be eligible for continuing education credit.

LEARNING OUTCOMES

- Acquire a landscape-level understanding of performance characteristics of fossil fuel, renewable resource and demand side resources operating in the Western Interconnect
- Identify the emerging adoption trends of demand side resources and energy storage technologies operating in the Western Interconnect
- Evaluate the operational challenges confronting the western bulk power system in the context of a distributed energy resource future
- Examine the latest electric market initiatives in process (CAISO-based Energy Imbalance Market and evolving Day-Ahead market services, as well as SPP Energy Imbalance Services)
- Identify the latest emerging, energy-related market and utility regulatory issues impacting utilities, system planners, public interest advocates and regulators along with their operational implications

INSTRUCTORS

- **Vijay Satyal**, Senior Energy Market Policy Analyst, Western Resource Advocates
- **Julia Prochnik**, Executive Director, Long Duration Energy Storage Association of California
- **Kavita Sheno**i, Consulting Manager, Siemens PTI
- **Konstantinos Oikonomou**, Power Systems Engineer, Pacific Northwest National Laboratory

ONLINE DELIVERY & PARTICIPATION DETAILS

EUCI will use Microsoft Teams to facilitate participation in the upcoming event. Attendees do not need to have an existing Teams account to participate in the broadcast. The course will play in attendee's browser. When attendees sign on, their microphones are typically muted. Attendees should keep their mic muted until such time as it's needed to ask a question. During the event, participants will have the option of using a microphone to speak with the room and ask questions, or type in any questions via the chat window and our online administrator will relay your question to the instructor.

- Each attendee will receive an event invitation by e-mail, which will include one link to sign on for each half-day of the event (i.e., three links for a 1 ½ day event). The appropriate link must be used to join each half-day event segment at the appropriate time.
- The remote meeting connection will open approximately 30 minutes before the start of the course. We encourage attendees to connect as early as possible in case of unforeseen problems.

Substitutions & Cancellations

Your registration may be transferred to a member of your organization up to 24 hours in advance of the event. Cancellations must be received on or before August 28, 2020 in order to be refunded and will be subject to a US \$195.00 processing fee per registrant. No refunds will be made after this date. Cancellations received after this date will create a credit of the tuition (less processing fee) good toward any other EUCI event. This credit will be good for six months from the cancellation date. In the event of non-attendance, all registration fees will be forfeited. In case of course cancellation, EUCI's liability is limited to refund of the event registration fee only. For more information regarding administrative policies, such as complaints and refunds, please contact our offices. EUCI reserves the right to alter this program without prior notice.
