SUPPLY CHAIN MANAGEMENT FOR UTILITIES CONFERENCE

October 12-13, 2017 | Omni Dallas Hotel | Dallas, Texas

The field of supply chains for utilities is not standing still. Technology, digitization and automation are dramatically changing the supply chain. Utility supply chain experts have recognized that there is still plenty of room for improvement, and that while some utilities and generators are leading the way on managing lean, efficient, smooth-running supply chains, many others still have substantial savings and efficiencies to capture, particularly when looking at different needs for different states/regions in which each utility operates.

Through a series of interactive and engaging sessions, mini-panels and presentations, the Supply Chain Management for Utilities Conference will tackle issues such as:

- **Supply Chain Management for the Future**
- **Strategic Sourcing**
- **Inventory Control**
- **Green Logistics**
- **Talent Management**
- **Asset Management**
- **Supplier Integration**
- **Risk Management**
- **Sustainability**
- **Contract Management**
- **Supplier Diversity**
- **And More**

Speakers

- **Rodney Long**, Director, Sourcing, Duke Energy
- **Timothy McAreavey**, Director, Supply Chain Management, Omaha Public Power District
- **Karen Cook**, Planning & Purchasing Manager, Xcel Energy
- **Alan Cooper**, Senior Supply Chain Manager, NextEra Energy
