“Very well done! A lot of information presented in an easy to follow manner. Excellent instruction that keeps both experts and novices up to date.”

Dominion Energy

Environmental permitting affects many utility projects in the United States. Often, these processes impose delays, constraints, and additional costs that are not anticipated by the project team. The goal of this course is to provide attendees with a broad understanding of many of the commonly encountered permitting processes associated with construction, maintenance, and operational activities.

This course will strive to inform attendees of when permitting may be necessary and to provide an understanding of the process for navigating these permitting processes. Relying on experience working on hundreds of previous projects on these subjects, course instructors will provide case studies to highlight lessons learned and successful approaches. An additional goal of this course will be to provide attendees with tools to make environmental permitting a more efficient component of their organization's project management.

LEARNING OUTCOMES

- Identify utility and energy project activities that are likely to “trigger” environmental regulation under Clean Water Act, Endangered Species Act, National Environmental Policy Act, and floodplain law
- Discuss the basis and intent of these regulations
- Develop approaches to minimize regulatory burden through project modification
- Create permitting timelines for projects
- Access resources that can help navigate environmental permitting
- Engage in opportunities to influence regulations and policy
- Discuss how to manage consultants assisting with regulatory compliance
- Review case studies related to Sections 402 and 404 of the Clean Water Act and the ESA

INSTRUCTORS

- **Brooke Wahlberg**, Partner, Nossaman
- **Karl Lotspeich**, Senior NEPA / Impact Assessment & Permitting Manager, AECOM
- **Tom Russo**, Principal, Russo on Energy

ONLINE DELIVERY & PARTICIPATION DETAILS

EUCI will use Microsoft Teams to facilitate participation in the upcoming event. Attendees do not need to have an existing Teams account to participate in the broadcast. The course will play in attendee's browser. When attendees sign on, their microphones are typically muted. Attendees should keep their mic muted until such time as it's needed to ask a question. During the event, participants will have the option of using a microphone to speak with the room and ask questions, or type in any questions via the chat window and our online administrator will relay your question to the instructor.

- Each attendee will receive an event invitation by e-mail, which will include one link to sign on for each half-day of the event (i.e., three links for a 1 ½ day event). The appropriate link must be used to join each half-day event segment at the appropriate time.
- The remote meeting connection will open approximately 30 minutes before the start of the course. We encourage attendees to connect as early as possible in case of unforeseen problems.
