In this course, pole strength capacities will be explained along with the loading criteria of the NESC and GO 95. An overview along with hands-on examples of basic pole loading calculations will help with understanding the important aspects and variables that impact how a pole is loaded. Variations of the third-party attachment processes around the country will be briefly explained and followed with an emphasis on the importance of wire and equipment clearances and the make ready process. Managing wood pole data including strength and loading details will also be discussed.

## LEARNING OUTCOMES

- Explain ANSI O5.1 wood pole manufacturing and dimension standards
- In-depth review of NESC strength and loading criteria along with an overview of GO 95 criteria
- Comparisons of key NESC requirements to similar GO 95 requirements
- Identify clearance basics
- Discuss the process for third-party attachments
- Comparisons of pole loading software programs
- Discuss best practices for managing wood poles and the tremendous amount of related data
- Discuss best practices for adding attachments to existing poles

# ONLINE DELIVERY & PARTICIPATION DETAILS

EUCI will use Microsoft Teams to facilitate participation in the upcoming event. Attendees do not need to have an existing Teams account to participate in the broadcast. The course will play in attendee's browser. When attendees sign on, their microphones are typically muted. Attendees should keep their mic muted until such time as it's needed to ask a question. During the event, participants will have the option of using a microphone to speak with the room and ask questions, or type in any questions via the chat window and our online administrator will relay your question to the instructor.

- Each attendee will receive an event invitation by e-mail, which will include one link to sign on for each half-day of the event (i.e., three links for a 1 ½ day event). The appropriate link must be used to join each half-day event segment at the appropriate time.
- The remote meeting connection will open approximately 30 minutes before the start of the course. We encourage attendees to connect as early as possible in case of unforeseen problems.
