ACCIDENT & INCIDENT INVESTIGATION FOR UPSTREAM OIL & GAS

March 31, 2015
Houston Marriott West Loop by The Galleria
Houston, TX
OVERVIEW

There is seldom a single cause for an accident or an incident. The source of each accident and the subsequent analysis should build a picture of events and how to avoid accidents and incidents in the future. This course will cover the OSHA accident & incident process. The instructor will provide an analysis of fall fatalities within upstream oil and gas. Attendees will develop the knowledge and skills to anticipate, recognize, evaluate and control hazards common to the on-shore oil and gas exploration and production industry. Participants will analyze actual case studies for “boots on the ground” experience understanding the details of each circumstance and engage in a discussion of OSHA hot topics and FAQ’s. Attendees will leave with tools and strategies to win accident/incident investigation cases.

WHO SHOULD ATTEND

- Upstream oil & gas c-level executives
- Project managers
- Facility managers
- Oil & gas insurance providers
- HSE professionals
- Maintenance managers
- Regulatory professionals
- Individuals new to oil and gas regulatory investigations and OSHA
- Energy lawyers
- In-house counsel
- Risk managers
- Insurance counsels

LEARNING OUTCOMES

- Discuss an overview of OSHA accident & incident investigations
- Describe the OSHA investigation process from start to finish
- Evaluate OSHA 5810: OSHA Hazard Recognition and Standards for On-Shore Oil and Gas Exploration and Production
- Develop the knowledge and skills to anticipate, recognize, evaluate and control hazards common to the on-shore oil and gas exploration and production industry.
- Analyze actual case studies while gaining an understanding and the details involved in the investigation process throughout each case
- Discuss tools and strategies to win an accident/incident investigation case
- Assess how social media impacts your accident/incident investigation case
- Review OSHA hot topics & FAQ’s

INSTRUCTOR

Marcella Della Casa / Partner / Burleson LLP

Marcella A. Della Casa has significant courtroom experience. She has championed cases from voir dire to arguing before court of appeals. With an emphasis on construction litigation and personal injury defense, Marcella has obtained numerous total defense verdicts as the first chair trial lawyer in cases where the amount sought was in excess of $1 Million. Her expertise extends to all areas of construction litigation, focusing on the defense of custom builders, remodelers, and subcontractors.

Marcella's undergraduate and graduate education was devoted to the fields of biology and chemistry. Her success in construction defense litigation is attributed in large part to her dedication to developing an expertise in every aspect of civil, structural and geotechnical engineering; fire and explosion investigation as well as construction science.

Marcella also has significant defense experience in managing and coordinating depositions and discovery in multi-plaintiff property damage cases (in excess of 500 plaintiffs) in South Texas resulting from the acquisition of seismic data and geophysical services used for oil and gas exploration.

### Overview of OSHA Accidents/Incidents
- Types and trends of accidents and incidents found in general industry, construction or traffic accidents
- Don’t investigate injuries! Predict and prevent them.
- An analysis of fall fatalities in the U.S. oil and gas extraction industry

### OSHA Investigation
- The OSHA investigation process: From start to finish

### OSHA Hazard Recognition and Standards for On-Shore Oil and Gas Exploration and Production (OSHA 5810)
- Developing the knowledge and skills to anticipate, recognize, evaluate and control hazards common to the on-shore oil and gas exploration and production industry
- This includes work sites associated with the on-shore exploration and production oil and gas industry including, but not limited to: construction, drilling, completion, well servicing, production, product gathering and processing, and product transmission

### Accident Investigation
- Analyzing actual case studies while gaining an understanding and the details involved in the investigation process throughout each case
- Tools and strategies to win an accident or incident investigation case
- Pros and cons of hiring a 3rd party consultant vs. internal employee to handle your company’s accident and incident investigations
- Who, what, When, where, and why: Investigating an accident or incident that will hold up all the way to the Supreme Court
- Social Media and how it effects your investigation
- Roles and Responsibilities of all parties involved

### OSHA FAQs and Hot Topics
- Open floor for questions and discussion of current event OSHA topics
- Hydrogen Sulfide (H2S) Forum
- OSHA’s rulemaking: What’s changing now and what may be changing in the future
INSTRUCTIONAL METHODS

Case Studies, Power Point presentations and classroom exercise will be used.

REQUIREMENTS FOR SUCCESSFUL COMPLETION OF PROGRAM

Participants must sign in/out each day and be in attendance for the entirety of the course to be eligible for continuing education credit.

CREDITS
