

INTRODUCTION TO THE NATURAL GAS INDUSTRY, INFRASTRUCTURE AND REGULATIONS

July 26, 2017
Royal Sonesta Houston
Houston, TX

EUCI is authorized
by IACET to offer
0.7 CEUs for the
course

OVERVIEW

This course will present an overview of the natural gas industry and related natural gas liquids (NGLs) and shale oil infrastructure so that attendees gain a comprehensive understanding of the gas industry and markets. Attendees will discuss natural gas terminology, measurements and conversions. They will review the basics of natural gas production, gathering, operations and markets. It will provide an in-depth understanding of natural gas processing plants, pipelines, storage, LNG peak shaving plants, LNG Import and Export terminals and local distribution companies (LDCs). The course will address important components of natural gas transportation, including regional costs of firm and interruptible pipeline transportation, nominations, balancing, and section 4 and 5 ratemaking proceedings on natural gas pipeline transportation.

The intent is that participants will be able to apply the information learned the first day they return to their jobs. Hands-on activities will be included throughout the day.

LEARNING OUTCOMES

- Explain the natural gas value chain: upstream, midstream and downstream
- Discuss natural gas terminology, measurements and conversions
- Review the basics of natural gas production
- Describe the types of shale plays
- Discuss natural gas gathering, operations and markets
- Address natural gas processing plants
- Review elements of natural gas producer economics
- Explain fungibility and gas interchangeability in U.S., Asia and Europe
- Describe natural gas pipelines, including their parts, how they operate, and their role in a changing market
- Evaluate natural gas storage types, operations and storage issues
- Discuss an overview of liquefied natural gas (LNG)
- Address peak shaving plants
- Review Local Distribution Companies (LDCs)
- State the process of natural gas infrastructure siting
- Discuss the role that natural gas plays in integrating wind and solar energy into the electric grid and Clean Power Plan
- Describe how FERC policy, major orders and regulations have evolved into today's "Open Access" environment
- Relate an overview of regulated rate components and rate design and new rate policies on the horizon
- Address important components of transportation, including: Pooling, nominations, confirmations, scheduling, receipt, and balancing
- Explain PDAs, OBAs, OFOs, allocations, and curtailments

“Excellent course for those in your organization that are newer employees of need to become familiar with natural gas basics from wellhead to burner tip.”

Director of Operations, WPPI Energy

AGENDA

WEDNESDAY, JULY 26, 2017

7:30 – 8:00 am Registration and Continental Breakfast

8:00 am – 4:00 pm Course Timing

12:00 – 1:00 pm Group Luncheon

The Natural Gas Value Chain

- Upstream
- Midstream
- Downstream
- How the natural gas industry operates across the value chain

Natural Gas Basics

- Terminology
- Measurements
- Conversions

Basics of Natural Gas Production

- Conventional
- Horizontal drilling
- Hydraulic fracturing

Kinds of Shale Plays

- Dry
- Wet
- Oil
- Locations

Industry Basics

- Gas gathering
- Operations
- Markets
- Regulatory considerations

Producer Economics

- Natural gas processing plants
- Pipeline quality
- Economic importance of NGLs

Fungibility and Gas Interchangeability in U.S., Asia and Europe

Natural Gas Pipelines

- Key parts
- How pipelines operate
- Who are the pipeline players?
- Role of shippers and purchasers
- Issues pipelines face in a changing market

AGENDA

WEDNESDAY, JULY 26, 2017 (CONTINUED)

Natural Gas Storage

- Different types
- Operations
- Storage development
- Regulatory issues

Liquefied Natural Gas (LNG)

- Basics
- Import/export terminals
- Vessels

Peak Shaving Plants

- Who uses them
- Locations
- Why they are important

Local Distribution Companies (LDCs)

- Physical plant-related operations
- How they work
- Economic trends
- Rates
- Regulatory trends

Natural Gas Infrastructure Siting: Who Regulates What

Greening of Power Sector

- Role that natural gas plays in integrating wind and solar energy into the electric grid and Clean Power Plan

Natural Gas Regulations

- Who regulates what, where, how, and why
- How FERC policy, major Orders and regulations have evolved into today's "Open Access" environment
- How natural gas delivery and storage is regulated across the value chain
- Significant FERC regulatory initiatives, policies and Orders that have transformed the industry
- Hot policy, regulatory, environmental, and safety issues that may impact how the industry operates
- Overview of regulated rate components and rate design and new rate policies on the horizon
- The fundamentals of Certificate and Rate Proceedings and how to understand capacity matters and pipeline tariffs, transportation services, agreements, and rates using FERC's etariff and FERC forms

"Good course to learn basics of natural gas industry."

Energy Market Consultant,
Energy Exemplar

"Worthwhile, enough in-depth information to fill the day without being overwhelming."

Product Manager, Extrel CMS

AGENDA

WEDNESDAY, JULY 26, 2017 (CONTINUED)

Gas Transportation through the Value Chain

- Overview of gas transportation
- Pooling
- Nominations
- Confirmations
- Scheduling
- Receipt
- Delivery point priorities
- Balancing
- Predetermined Allocation (PDA)
- Operational Balancing Agreement (OBA)
- Operational Flow Order (OFO)
- Allocations
- Penalties
- Interruptions
- Curtailments
- The essential factors involved in bringing gas to market, transportation services and types, rates and rate components and pipeline tariff components

INSTRUCTOR

Tom Russo

Principal, Russo on Energy LLC

Tom Russo is an Energy and Environmental expert with unique regulatory skills in siting energy infrastructure, markets and physical/cybersecurity.

Prior to founding Russo on Energy LLC in May 2015, Mr. Russo worked for over 30 years as a Manager and Sr. Energy Industry Analyst at the Federal Energy Regulatory Commission (FERC). During that time he amassed experience in hydropower licensing, NEPA environmental impact assessment of energy projects, business process reengineering, and natural gas and crude oil market oversight. Mr. Russo thoroughly understands the Natural Gas Act, Natural Gas Policy Act, Federal Power Act and Energy Policy Act as they apply to natural gas and hydroelectric projects. He also assisted FERC's new Energy Infrastructure Security Office with understanding physical and cybersecurity threats and vulnerabilities to natural gas, oil and gas-fired power projects and physical natural gas and related futures and swaps.

In FERC's Office of Enforcement, he managed and led efforts on the development and implementation of FERC Order 704 and FERC's Form 552 Annual Natural Gas Transaction Report program from 2008 to 2015. He also has helped numerous energy companies address FERC compliance issues in the natural gas, LNG, and hydropower area, as well as natural gas market participants in achieving compliance with transactional issues related to natural gas indices and index formation.

Mr. Russo is a native of Brooklyn, New York. He earned a credential as a Certified Information Systems Security Professional (CISSP) in 2010. He also graduated with a MBA in Finance from the George Washington University and a MS in Biology from the University of Alabama.

REQUIREMENTS FOR SUCCESSFUL COMPLETION OF PROGRAM

Participants must sign in/out each day and be in attendance for the entirety of the course to be eligible for continuing education credit.

INSTRUCTIONAL METHODS

Case studies, PowerPoint presentations, classroom exercises

PROCEEDINGS

The proceedings of the course will be published, and one copy will be distributed to each registrant at the course.

EVENT LOCATION

A room block has been reserved at the Royal Sonesta Houston, 2222 West Loop S, Houston, TX 77027, for the nights of July 23- 26, 2017. Room rates are \$139 plus applicable tax. Call **1-713-627-7600** for reservations and mention the EUCI event to get the group rate. The cutoff date to receive the group rate is June 23, 2017 but as there are a limited number of rooms available at this rate, the room block may close sooner. ***Please make your reservations early.***

IACET CREDITS

EUCI has been accredited as an Authorized Provider by the International Association for Continuing Education and Training (IACET). In obtaining this accreditation, EUCI has demonstrated that it complies with the ANSI/IACET Standard which is recognized internationally as a standard of good practice. As a result of their Authorized Provider status, EUCI is authorized to offer IACET CEUs for its programs that qualify under the ANSI/IACET Standard.

EUCI is authorized by IACET to offer 0.7 CEUs for the course.

Substitutions & Cancellations

Your registration may be transferred to a member of your organization up to 24 hours in advance of the event. Cancellations must be received on or before June 23, 2017 in order to be refunded and will be subject to a US \$195.00 processing fee per registrant. No refunds will be made after this date. Cancellations received after this date will create a credit of the tuition (less processing fee) good toward any other EUCL event. This credit will be good for six months from the cancellation date. In the event of non-attendance, all registration fees will be forfeited. In case of course cancellation, EUCL's liability is limited to refund of the event registration fee only. For more information regarding administrative policies, such as complaints and refunds, please contact our offices at (201) 871-0474.
