2001 U.S. Non-Utility Power Directory

This revised and updated directory includes more than 2700 non-utility plant listings, including owners and operators. Detailed information (where available) of each plant includes contacts, address, phone and fax numbers, installed capacity, year installed, number of employees, net generation, number of units, prime mover, fuel type and detailed hydro attributes. Company information includes company name, contact, address, phone and fax numbers, website and revenues (if available). This directory is fully exportable. Each CD includes the following formats: MSAccess, MSEXcel, Dbase and DOS-Text. *Normal Price: \$695*

You Get BOTH Directories on CD-ROM for Only \$1272 (20% Off the Normal Price)

Order now and receive a **free** one year subscription to **Merchant Power Monthly** (pdf format). Normally \$295/year, Merchant Power Monthly every month provides you with the name and address of the contact for each newly planned powerplant, its corporate structure, ownership changes and even foreign plants. Gleaned from FERC dockets, Merchant Power Monthly also provides you with the docket number for each plant, so you can follow up and pull full documentation on any plants which are of interest. MPM also provides you with feature stories on plants in progress from around the country. [Click here to download a free sample.](#)
